EXPERIENCE

Mission Sustainability, Gandhinagar — *Software Developer Intern*

May 2023 - June 2023

- Worked on a client project to set up and build an ecommerce store.
- Created the backend schema and frontend design from scratch
- Contributed on creating an algorithm which displays similar content based on specific priorities

PROJECTS

Cloth renting website — *Laravel, PHP*

- Built a web app which allows users to rent clothes online.
- Built this website as a diploma college project in 2023.
- It allows admin users to modify and manage the website.

Ecommerce & Blog website —PHP, SQL

- Built a website using php and sql as backend.
- This website allows users to login and order products.
- Users can also read and write their own blogs.

Quotes app —Javascript, APIs

- Built a quotes app which fetches the data from using a REST API.
- It also filters the quotes through author names.
